EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Shimokaji on June 23, 2004.

The application has been amended as follows:

IN THE CLAIMS:

Claim 34, line 2, "comprises" is deleted, and – is – is inserted in its place.

Claim 41, line 2, "comprises" is deleted, and – is – is inserted in its place.

Claim 47, line 2, "comprises" is deleted, and – is – is inserted in its place.

Claim 50, last line, "about" is deleted.

Claims 59-63 are cancelled.

2. The amendments to claims 34, 41 and 47 clarify that the material is yttria, corresponding to the language used in the parent claims. The amendment to claim 50 removes the term about as to the thickness, since the specification and claims as originally filed provide support for 50 mils, but not "about" 50 mils. Claims 59-63 have been canceled. The Examiner would otherwise have used *Burdette, II* (US 5338577) to reject these claims, as *Burdette* teaches the depositing of a thermal barrier layer followed by a layer of alumina, which would act as a

Art Unit: 1762

carbon deposit inhibiting material (see column 3, lines 40-60), and that the alumina can be applied by plasma spraying (see column 8, lines 15-35).

3. The May 3, 2004 and the Examiner's Amendment above overcome all of the outstanding objections and rejections. As to the specification, it has been amended to provide reference to the patent number of the parent case. As to the 35 USC 102 rejections using Bruce, the Examiner notes that independent claims 29, 42 and 57 provide that the carbon deposit inhibiting material is yttria or lanthanum oxide, not the alumina applied by Bruce. The other independent claim, claim 50, provides a coating thickness far greater than that applied by Bruce. As a result, the features of the claims are not taught or suggested by Bruce. As to the 35 USC 102 and 103 rejections using Subramanian, the Examiner notes that this reference does not teach or suggest a coating thickness as in claim 50 and that it does not teach the lanthanum oxide as claimed in the present claims due to the pyrochlore material applied.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Katherine A. Bareford whose telephone number is (571) 272-1413. The examiner can normally be reached on M-F(6:30-4:00) with the First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive P. Beck can be reached on (571) 272-1415.
